PROFILE OVERVIEW

Java and Python Developer Fresher with a strong foundation in Data Structures, Object-Oriented Programming, Operating System concepts, and System Programming. Hands-on experience in developing backend applications using Java, Spring Boot, REST APIs, MongoDB, and building automation tools with Python. Proficient in API development, database integration, and software development using Git and Postman through academic and industry-oriented projects. Passionate about designing scalable, secure, and high-performance software solutions while continuously learning emerging technologies.

TECHNICAL SKILLS

Languages: C/C++, Java, Python

Concepts: Networking Fundamentals, JDBC Connectivity, File Handling, Process Automation

Database: MySQL, MongoDB

Developer Tools: Eclipse, Visual Studio Code, IntelliJ, Apache Tomcat, Postman, Git

Backend: Spring Boot, REST API

PROJECTS

EduTrack – Student Management Portal | Java | Spring Boot | MongoDB | REST API

- Developed RESTful backend services for managing student and batch information.
- Designed CRUD APIs using Spring Boot and integrated MongoDB.
- Tested APIs using Postman.

Automated Disk Sanitizer | Python | OS Module | Schedule | File Handling

- Developed an automated disk sanitization tool to securely delete files and folders.
- Implemented scheduled cleanup operations with detailed execution logging.
- Generated operation reports to verify successful file deletion and improve data security.

Automated Platform Surveillance System | Python | psutil | Schedule | OS

- Developed a system monitoring tool to track running processes and system resource utilization.
- Automated periodic monitoring using the schedule library and collected CPU, memory, and process information with psutil.
- Generated monitoring logs to support system health analysis and performance monitoring.
